

Vaibhav Singh

Data Analyst — Data Engineer — AI & Data Science Specialist

+91-9129019491 | singhvaibhav849@gmail.com | LinkedIn | Portfolio | GitHub | Greater Noida, Uttar Pradesh, India

Summary

Dynamic Artificial Intelligence and Data Science undergraduate equipped with a robust foundation in statistical modeling, predictive machine learning, and business intelligence visualization. Proven capability to architect data pipelines, clean massive datasets, and build intelligent extraction agents. Adept at leveraging Python, SQL, and Power BI within Agile workflows, backed by a Government of India design patent for intelligent hardware solutions.

Education

Greater Noida Institute of Technology (GNIOT)

Expected 2027

B.Tech in Computer Science and Engineering – Artificial Intelligence and Data Science

Technical Skills

Data Analytics & Business Intelligence: Power BI, Power Query, Tableau

Data Engineering & Databases: SQL, MongoDB

Programming Languages: Python (Pandas, NumPy, Scikit-Learn, Pytorch, TensorFlow), JavaScript

Machine Learning & Core Competencies: LLM, RAG, Neural Networks, Generative AI, Data Structures & Algorithms (DSA), Object-Oriented Programming (OOPs)

Developer Tools & DevOps: Git, GitHub, Version Control, Prompt Engineering

Professional Experience

ElevenSkills – Software Development Intern

Mar 2026 – May 2026 (1 Month Virtual)

- Engineered full-stack platform components using *React.js* and *Node.js*, meticulously managing relational data flows and secure token-based authentication workflows
- Designed, developed, and optimized RESTful APIs for high-frequency user data tracking and real-time backend synchronization

Projects

AI-Powered Web Scraping Agent (Python, BeautifulSoup, Gemini API)

Feb 2026 – Present

GitHub: github.com/vaibhav91-singh

- Developed an intelligent web scraping agent using *Python*, *Requests*, and *BeautifulSoup* to automatically extract and clean unstructured text from dynamic websites with custom headers
- Integrated the Google GenAI SDK (Gemini-2.5-flash) via an OpenAI-compatible client to process scraped webpage content and answer context-specific user queries accurately
- Implemented robust exception handling and automated script optimization to streamline data retrieval and text parsing workflows for downstream analysis

Rapido Logistics Analysis (Power BI, DAX)

Mar 2026 – Apr 2026

GitHub: github.com/vaibhav91-singh

- Analyzed extensive bike-taxi ride datasets to precisely identify demand hotspots and visualize granular profit-per-ride metrics
- Developed dynamic Power BI dashboards to monitor operational turnaround times, driver allocation efficiency, and overall fleet productivity

Blinkit & Uber Market Analysis (Power BI, Python)

Jan 2026 – Feb 2026

GitHub: github.com/vaibhav91-singh

- Converted messy delivery data into clear business insights using *Power Query* and custom *DAX* measures
- Identified critical key performance indicators (KPIs) that successfully drove a projected 15 percent increase in driver allocation efficiency

Certifications

- Completed *Power BI For Data Analytics and Visualization* from **Microsoft** 2025
- Earned *React.js & Node.js Complete Web Development* from **Udemy** 2026
- Obtained *Full Stack Generative and Agentic AI with Python* from **Udemy** 2026

Patents & Achievements

- Design Patent (Govt. of India):** Real-Time Facial Expression Recognition Device (2025) – Registered Design No.: 452336-001; successfully conceptualized and developed AI-based hardware for automated emotion detection
- Researched and published an AI-powered touchless workout tracking methodology focused on real-time posture correction in the *International Journal of Information Movement*
